

PRODUCT NAME:

DETECTAMESH™ DETECTABLE TAPE

PRODUCT CODE/S:

WT06, WT07, WT08, WT09, WT10, WT12, WT25, WT26, WT30

KEY FEATURES:

Detectamesh™ detectable tape is a plastic mesh with a traceable stainless steel wire laminated between the mesh and a polyethylene tape which is printed with a warning message to warn future excavators of the location and potential danger of the utility services / pipes and cables below (Water Main, Gas Pipe, Electric Cable etc). The stainless steel wire acts as the detectable element that can be located by a CAT & GENNY (cable avoidance tool / cable and pipe locator) by direct connection or induction where applicable. Plastic mesh is manufactured to BS EN 12613:2001

USES

- marking energised and unenergised electric power cables
- marking fibre optic cables
- marking plastic gas and water pipes
- for locating services by using a cat and genny cable avoidance tool

DETAILS:

Underground warning tape is normally installed a specified distance directly above the service line so that any future excavators will be aware of the cable or pipeline further below.

CODE	COLOUR	SIZE	DESCRIPTION
WT06	GREEN	200MM X 100M	CAUTION TELEPHONE CABLE BELOW
WT07	YELLOW	200MM X 100M	CAUTION ELECTRICAL CABLE BELOW
WT08	YELLOW	200MM X 100M	CAUTION BURIED GAS PIPE
WT10	BLUE	200MM X 100M	CAUTION WATER PIPE BELOW
WT09	GREEN	200MM X 100M	CAUTION FIBREOPTIC CABLE
WT12	RED	200MM X 100M	CAUTION SEWER PIPE BELOW
WT25	YELLOW	200MM X 100M	CAUTION STREET LIGHT CABLE
WT26	BLUE	400MM X 100M	CAUTION WATER PIPE BELOW
WT30	RED	400MM X 100M	CAUTION SEWER PIPE BELOW

WEIGHT: 400 MM - 4.5 KG
200 MM - 2.25KG

STORAGE

STORE UNDER NORMAL CONDITIONS OF 70°F (21°C) AND 50% R.H. IN THE ORIGINAL CARTON.
