- Sealing around windows and door frames
- General glazing work
- Kitchen and bathroom sealing
- DIY home repairs
- Sanitary joints – sinks, showers, tiles
- Draught-proofing around fittings

INSTRUCTION FOR USE:

- Prepare Surfaces:
Surfaces must be clean, dry, and free of dust, grease, and old sealant.
- Apply the Sealant:
Cut the tip of the cartridge and attach the nozzle.
Apply using a standard caulking gun.
Smooth with a wet finger or tooling tool within 5–10 minutes.
- Curing:
Avoid water contact until fully cured (approx. 24 hours for 2mm).
Clean tools and excess sealant immediately with white spirit.
