

PRODUCT NAME:

EVERBUILD MITRE FAST KIT STANDARD

PRODUCT CODE/S:

EBMITREFAST

KEY FEATURES:

EVERBUILD MITRE FAST KIT STANDARD IS A HIGH-PERFORMANCE TWO-COMPONENT BONDING SYSTEM DESIGNED FOR RAPID FIXING OF MDF, WOOD, PLASTICS, RUBBER, AND MOST COMMON SUBSTRATES. THE KIT INCLUDES A CYANOACRYLATE ADHESIVE AND A SOLVENT-BASED AEROSOL ACTIVATOR THAT, WHEN USED TOGETHER, FORM AN ULTRA-FAST BOND IN LESS THAN 10 SECONDS.

- **BONDS IN 10 SECONDS – ULTRA-FAST CURING**
IDEAL FOR MITRE JOINTS, TRIMS, CORNICES, AND PROFILES
BONDS MDF, WOOD, PLASTICS, RUBBER, AND METALS
NO CLAMPING REQUIRED
EASY-TO-USE AEROSOL ACTIVATOR
SUITABLE FOR VERTICAL SURFACES
CLEAN, CLEAR ADHESIVE FINISH
AVAILABLE IN STANDARD KIT: 200ML ACTIVATOR + 50G ADHESIVE

DETAILS:

TECHNICAL SPECS:

Adhesive Type: Cyanoacrylate (superglue)
Activator Type: Solvent-based aerosol
Adhesive Size: 50g bottle
Activator Size: 200ml can
Colour: Clear (adhesive), transparent spray (activator)
Viscosity: Low – for quick absorption and thin bonding layers
Bond Time: 5–10 seconds (depending on material & conditions)
Service Temperature: -50°C to +80°C
Full Cure Time: 24 hours (bond usable in seconds)

IDEAL FOR:

- Mitre joints on skirting boards, architraves, trims
Fixing cornices, wooden mouldings, and edge profiles
Shopfitting and exhibition stands
Signage and plastic assembly
Fast wood and MDF bonding in joinery

INSTRUCTION FOR USE:

- **Surface Prep:** Ensure surfaces are clean, dry, and free of dust and grease.
Application:
Apply a small amount of adhesive to one surface.
Spray activator on the other surface.
Bonding: Bring surfaces together immediately and hold for 10–15 seconds.
Cure Time: Functional strength in seconds; full cure in 24 hours.
Clean-Up: Use acetone or a suitable solvent for uncured adhesive. Cured product must be removed mechanically.

Note: Do not overapply activator – a light mist is sufficient.
