

PRODUCT NAME:

CROMAR BACKING ROD

PRODUCT CODE/S:

BROWN	
EBX1BACK10	CROMAR 10MM BACKING ROD 1150MTR
EBX1BACK13	CROMAR 13MM BACKING ROD 750 MTR
EBX1BACK15	CROMAR 15MM BACKING ROD 550MTR
EBX1BACK20	CROMAR 20MM BACKING ROD 350MTR
EBX1BACK25	CROMAR 25MM BACKING ROD 200MTR
EBX1BACK30	CROMAR 30MM BACKING ROD 160MTR
EBX1BACK40	ARC 40MM BACKING ROD 270 MTR
EBX1BACK50	ARC 50MM BACKING ROD 180 MTR

DETAILS:
Full Description:

- The Backing Rod is a closed-cell, flexible polyethylene foam rod used in sealing and expansion joint applications. It prevents three-sided adhesion, improves the shape factor of the sealant, and ensures the correct depth is maintained during sealant application. Ideal for use in both vertical and horizontal joints, this rod is compatible with most sealant types and installation conditions.

Ideal For:

Expansion and movement joints in concrete and masonry
 Curtain wall joints
 Glazing systems
 Road and bridge joints
 Window and door perimeter joints
 Vertical and horizontal joints

Key Features:

High-quality closed-cell polyethylene foam.
 Easy to compress and insert.
 Controls joint depth for proper sealant application.
 Prevents three-sided adhesion, allowing optimal sealant performance.
 Compatible with silicone, polyurethane, polysulfide, and other sealants.
 Durable and flexible—resists rot and moisture.
 Lightweight and non-absorbent.

STANDARDS

BS EN ISO 11600
