

PRODUCT NAME:

STEEL WOOL

PRODUCT CODE/S:

12PCS PER PACK: SW101, SW102, SW103, SW104, SW105, SW106
SW107 SW108

KEY FEATURES:

Steel wool can prevent all kinds of mice and small animals from entering your home, and you only need to block it with steel wool.

Steel wool can be used for indoor and outdoor filling. Examples include holes or cracks in brick walls, ducted air conditioning units, windows, vents, siding, garages, kitchens, attics, etc. Effectively deters rodents, insects and other pests from entering the home or office building.

Steel wool can polish all kinds of rough and rusty products to make the surface of the product smooth and translucent. For example, wood furniture, marble crafts, metal crafts, metal products such as your car, etc., can be finely polished (it cannot be used on particularly rough surfaces)

Steel wool is made of thousands of high-quality metal fibers, similar to wool, thick and strong, and you can use a lighter to light the end of the steel wool in a very open place. The other end can be tied with a rope and looped in the air.

MATERIAL:

STEEL

SPECIFICATION:

GRADE	USE
