

PRODUCT NAME:

CLIMAX HOOK CONNECTOR OPEN 54 CM

PRODUCT CODE/S:

CLX2012

OVERVIEW:

The Climax Hook Connector Open 54 cm (CLX2012) is a high-strength safety connector designed for use in personal fall-protection systems. Its open hook design makes it easy to attach to secure anchor points, scaffolding, beams, or structural elements. With a 54 cm length, it offers extended reach for users working at height. Suitable for use with harnesses, lanyards, and positioning equipment in construction, roofing, industrial maintenance, and related applications.

DETAILS:
Key Features:

- 54 cm length for extended reach
- Open-style hook for quick and secure anchoring
- Strong and reliable construction for work-at-height environments
- Compatible with harnesses, lanyards, and fall-arrest systems
- Ideal for industrial, construction, and maintenance use

How to Use:

- Inspect the hook connector before use for damage or wear.
- Attach the open hook securely to an approved anchorage point.
- Connect the opposite end to your harness or lanyard.
- Ensure the hook is fully seated and secure before working.
- After use, clean, inspect, and store properly.
