

PRODUCT NAME:

MULTI-USE KNEE PROTECTION BOARD

PRODUCT CODE/S:

TL628B

OVERVIEW:

The TL628B Multi-Use Knee Protection Board offers reliable cushioning and protection for the knees during extended periods of kneeling. Made from high-density EVA foam, it effectively absorbs pressure and impact, reducing fatigue and discomfort on hard surfaces.

Its lightweight yet durable design makes it easy to carry around job sites, while the ergonomic shape ensures maximum comfort and stability. Perfect for use in construction, plumbing, electrical work, gardening, tiling, and household repairs, this knee board helps protect against strain and long-term knee injury.

With a non-slip, water-resistant surface, it performs well in both indoor and outdoor environments, ensuring dependable comfort and resilience under tough conditions.

DETAILS:
Key Features:

Superior Knee Protection – Reduces pressure and strain on joints during extended kneeling.
 High-Density Foam Cushioning – Provides excellent shock absorption and long-lasting comfort.
 Durable & Lightweight – Tough enough for worksite use yet easy to carry.
 Non-Slip, Water-Resistant Surface – Ideal for both indoor and outdoor environments.
 Ergonomic Design – Supports natural posture to prevent fatigue.
 Multi-Purpose Use – Suitable for tradespeople, gardeners, mechanics, and home users alike.
 Easy to Clean – Simply wipe down after use to maintain hygiene and performance.

How to Used:

Place the board on the surface before kneeling.
 Position knees in the centre of the board for maximum support.
 Adjust or reposition as needed for comfort and stability.
 After use, wipe clean with a damp cloth and store in a dry place.
