

**PRODUCT NAME:**

4-WAY EXTENSION LEAD 1 METER CABLE (13AMP PLUG, NEON LIGHT)

**PRODUCT CODE/S:**

EL2146

**KEY FEATURES:**

The EL2146 4-Way Extension Lead is a practical and safe power solution designed to extend a single outlet into four usable sockets. Equipped with a 1-meter cable and a 13-amp fused plug, it can support a total load of up to 3120W, making it ideal for everyday household and office appliances.

It operates on a 220-240V supply and includes a bright neon power indicator to show when the extension is active. Built for convenience, it also features wall-mounting slots to keep installations tidy and secure. With four evenly spaced sockets, this extension offers a reliable and organized way to power multiple devices from one location.

**DETAILS:**
**Key Features**

- 4-Gang Extension Socket — provides four power outlets from a single plug.
- 1-Meter Cable — compact length for neat and close-range applications.
- 13A Rated (Up to 3120W) — suitable for most household appliances and electronics.
- Voltage: 220–240V, 50Hz — compatible with standard household supply.
- Built-In 13A Fuse — adds an extra layer of electrical protection.
- Power LED Indicator — neon light shows when the extension is switched on.
- Wall-Mountable — includes rear mounting points for tidy installation.
- Durable & Safe Construction — designed for everyday long-term use.

**How to Use**

- Inspect the extension lead to ensure the cable and plug are undamaged.
- Plug the 13A fused plug into a compatible wall socket.
- Check the neon LED indicator; it will light up when power is active.
- Connect devices to the four sockets, ensuring the total load does not exceed 13A / 3120W.
- Use indoors and keep dry — this product is not designed for outdoor exposure.
- For wall mounting, align the rear mounting slots with screws or hooks on the wall and secure properly.
- Turn off and unplug when not in use or before cleaning.
