

PRODUCT NAME:

FESTOON HOOKS - 10PACK

PRODUCT CODE/S:

EL2170FESTHOOK

KEY FEATURES:

The EL2170 Festoon Hooks (10 Pack) are reliable and versatile hanging hooks designed for festoon lighting and site cables. Made from a strong thermoplastic polymer, these hooks are built to elevate cables safely above Floor level, helping reduce trip hazards in both indoor and outdoor environments.

Featuring omni-directional fixing points and a wall-mount design, they offer Flexible installation for a wide range of applications—including construction sites, workshops, event lighting, and general cable management. Each hook supports up to 40 grams and ensures secure, tidy, and hazard-free cable routing.

DETAILS:

Key Features:

Durable thermoplastic polymer construction

Perfect for festoon lights and site cables

Omni-directional fixing points for flexible installation

Elevates cables safely above floor level

Helps reduce trip hazards in work or public areas

Lightweight yet strong – maximum load: 40g per hook

Wall-mount design

Suitable for various applications: construction sites, events, workshops, garages, warehouses

Supplied in a 10-pack

How to Use:

Choose the mounting surface (wall, post, beam, or other suitable structure).

Secure the hook to the surface using appropriate screws or fixings for the material.

Insert festoon cable or lighting string into the hook's holding slot.

Adjust spacing between hooks to maintain proper cable height and avoid sagging.

Ensure cables are elevated above floor level to minimise trip hazards.

Hooks can be repositioned or reused as needed for different setups.
