

PRODUCT NAME:

DELUX KNEE PADS PROFESSIONALE

PRODUCT CODE/S:

TL113: DELUX KNEE PADS PROFESSIONALE

OVERVIEW:

The DELUX Knee Pads Professional (TL113) provide premium protection and comfort during extended periods of kneeling. Featuring a reinforced outer shell and thick, high-density foam padding, these knee pads absorb impact and reduce strain on knees while working on concrete, tile, wood, or soil. The adjustable straps ensure a secure fit for all-day use, making them a reliable choice for professional contractors and serious DIYers alike. Built for durability and ergonomic performance, these knee pads help improve safety and reduce fatigue on the job.

DETAILS:

Key Features:

- Heavy-duty outer shell for impact resistance and abrasion protection
- High-density foam padding for comfort and shock absorption
- Adjustable straps for a secure and custom fit
- Ergonomic design that conforms to the shape of the knee
- Suitable for long work sessions on hard surfaces
- Durable construction built for professional jobsite use
- Lightweight yet rugged for repeated use
- Easy to clean after use

How to Use:

- Position the Knee Pads:** Place each knee pad over the front of your knee so the padded area aligns with your kneecap.
- Adjust Straps:** Wrap the top and bottom straps around your leg and secure them snugly using the adjustable fasteners. They should be firm but not too tight to restrict movement or circulation.
- Check Fit:** Ensure the knee pads sit comfortably and do not shift when you bend or move.
- Work Safely:** Kneel and work as needed—padding will cushion impact and reduce stress on your joints.
- Remove and Clean:** After use, undo the straps, remove the knee pads, and wipe them clean if needed. After work is completed, carefully peel off the tape and dispose of it properly.
