

PRODUCT NAME:

NON ESB TILE TAPE

PRODUCT CODE/S:

AT39NOTESB- NON ESB 20MTR X 200MM X 2MM TILE TAPE
AT57NOTESB- NON ESB 20MTR X 400MM X 2MM TILE TAPE

OVERVIEW:

The Non-ESB Tile Protection Tape is a durable and flexible surface protection solution designed for use on tiled floors and walls during construction, renovation, and maintenance projects. Manufactured with a strong yet lightweight material, this tile tape effectively shields surfaces from scratches, dirt, paint, spills, and minor mechanical damage.

Its non-ESB composition makes it suitable for general construction and commercial environments where electrostatic discharge protection is not required. The tape is easy to handle, cut, and install, allowing quick coverage of large areas while maintaining a secure fit on the surface. Once the job is completed, it can be removed cleanly without leaving adhesive residue or damaging the tiles.

Ideal for contractors, installers, and maintenance teams, this tile tape helps maintain a clean and professional worksite while preserving the original finish of tiled surfaces.

DETAILS:

Key Features:

- Non-ESB tile surface protection
- Protects against scratches, dust, paint, and spills
- Flexible and lightweight for easy handling
- Quick and simple installation
- Clean removal without residue
- Suitable for floor and wall tile protection
- Ideal for construction, renovation, and maintenance works

Technical Information:

- Product Type: Tile Protection Tape
- Material Thickness: 2mm
- Protection: Non-ESB
- Application Surface: Tile floors and walls
- Color: Standard (varies by batch)
- Usage: Temporary surface protection

Available Sizes:

- AT57NOTESB: 20 meters × 400 mm × 2 mm
- AT39NOTESB: 20 meters × 200 mm × 2 mm

How to Use:

- Ensure the tile surface is clean, dry, and free from debris.
- Roll out the tile tape over the area to be protected.
- Cut the tape to the required length using a utility knife or scissors.
- Press firmly to ensure proper adhesion and coverage.
- Overlap edges slightly if covering large areas.
- After work is completed, carefully peel off the tape and dispose of it properly.
