PRODUCT NAME:
SMOKE DETECTOR ALARM
PRODUCT CODE/S:
EL2226
OVERVIEW

THE SAFELINE SMOKE DETECTOR ALARM EL2226 IS DESIGNED TO DETECT THE PRESENCE OF SMOKE IN INDOOR ENVIRONMENTS, PROVIDING AN EARLY WARNING IN THE EVENT OF A FIRE. IT IS AN ESSENTIAL SAFETY DEVICE FOR HOMES, OFFICES, AND OTHER INDOOR SPACES TO PREVENT FIRE-RELATED INJURIES OR FATALITIES.

DETAILS:

Key Features:

- **Sensitive Smoke Detection:** Equipped with advanced sensors to detect smoke particles in the air, triggering the alarm when smoke levels reach a dangerous threshold.
- **Loud Alarm:** Emits a loud, distinct sound to alert occupants of the presence of smoke, giving them time to evacuate or take action.
- **Battery-Powered:** Typically powered by a battery, making it easy to install in any room without the need for wiring.
- **Test and Reset Function:** Allows users to test the smoke detector to ensure it's functioning properly, as well as a reset feature after an alarm.
- **Low Battery Indicator:** Alerts users when the battery needs replacing, ensuring the device is always operational.
- **Compact and Discreet Design:** The smoke detector is designed to be unobtrusive, fitting seamlessly into ceilings without detracting from the room's decor.

Applications:

- **Homes:** Ideal for installation in kitchens, hallways, bedrooms, and other areas where fire safety is a priority.
- **Offices and Workplaces:** Provides an essential layer of fire safety in offices, warehouses, and other commercial spaces.
