

DESCRIPTION & FEATURES

Weight:600g

Unique design Handle

All steel drop-forged roofing hammer

Heat treatment

Packed by paper card

SELLING POINTS

1. The hammer handle made of soft and non-slip rubber and TPR material coating provides excellent comfort and strong grip, while the fiberglass structure absorbs vibration and reduces fatigue. 2. The sturdy straight claw design can pull out nails more effortlessly, and the claw tips of different lengths are easier to tear or puncture holes. 3. The one-piece forged hammer body is more solid, not easy to fall, and safe to use.
